Lead Editor: Jim Sumser
Technical Reviewer: Erik Gunvaldson
Editorial Board: Steve Anglin, Ewan Buckingham, Gary Cornell, Jason Gilmore, Jonathan Gennick, Jonathan Hassell, James Huddleston, Chris Mills, Matthew Moodie, Dominic Shakeshaft, Jim Sumser, Keir Thomas, Matt Wade
Project Manager: Richard Dal Porto
Copy Edit Manager: Nicole LeClerc
Copy Editor: Ami Knox
Assistant Production Director: Kari Brooks-Copony
Production Editor: Katie Stence
Compositor: Susan Glinert
Proofreader: Kim Burton
Indexer: Broccoli Information Management
Artist: April Milne
Cover Designer: Kurt Krames
Manufacturing Director: Tom Debolski

Contents

Foreword xiii
About the Authors xix
About the Technical Reviewer xxi
Acknowledgments xxii
Introduction xxiii

CHAPTER 1 Software Factories Overview 1

The Rationale for Software Factories 1
One-off Development 3
Monolithic Systems 4
Working at a Low Level of Abstraction 4
Process Immaturity 5
Increasing Demand for Software 6
Software Factories in a Nutshell 7
Conceptual Foundation 7
Software Factories Explained 13
Benefits 16
Liabilities 17
Building a Software Factory: High-level Process 18
Summary 19

CHAPTER 2 Software Factory Definition 21

Software Factory Overview 22
Software Factory Vision 25
Software Factory Inputs 27
Application and Software Factory Constraints 28
Application Constraints 29
Software Factories Constraints 30
Stakeholder Description 32

Software Factory Context 34
Application Context 34
Factory Context 35
Domain Glossary 35
Summary 37

CHAPTER 3 **Software Factory Specification** 39

Problem Domain and Solution Domain 41
Domain Model 42
Candidate Problem Feature Matrix 44
Feature Modeling Explained 47
Feature-modeling Syntax 48
Creating and Refining a Feature Model 50
Feature Models Compared to UML Class Diagrams 52
Configuration Based on Feature Models 52
Problem Feature Model 54
Solution Feature Matrix and Solution Feature Model 55
Domain Scoping 57
Elaborating Requirements 59
Summary 60

CHAPTER 4 **Software Factory Schema: Architecture** 61

Introduction to the Software Factory Schema 62
Software Factory Architecture 63
Architectural Variability 64
Product Line Architecture Definition Process 66
Reference Architectures 68
Architectural Description 73
ISpySoft Viewpoints 75
Data Entity Viewpoint 76
Business Workflow Viewpoint 77
Smart Client Software Factory Viewpoints 81
Component Structure Viewpoint 83
Distributed System Viewpoint 86
Summary 91

CHAPTER 5 Software Factory Schema: Application Development Process 93

Application Development with Software Factories 94
Application Requirements Analysis. 95
Application Feature Model Configuration 97
Application Implementation 99
Software Factory Evolution: Feedback into the Software Factory. 100
Activities and Tools in the Software Factory Schema 101
Mappings in the Software Factories Schema 103
Models, Model Transformations, and Generators 106
Domain-specific Languages 106
Model Transformations 109
Generators 111
Raising the Level of Abstraction 112
Implementing a Software Factory Schema DSL 114
Using Microsoft DSL Tools. 115
ISpySoft Software Factory Schema 116
Code Generation with DSL Tools. 118
Summary 120

CHAPTER 6 Software Factory Template: Application Core Assets 121

Approaching the Software Factory Template 122
Assets, Activities, and Work Products 124
Developing the Back-end Services 126
Data Entity Model and Object-relational Mapping with NHibernate 126
Physical Data Model 128
Exposing Business Logic Through Web Services 130
Creating the Shell Application 132
Developing the Client-side Service Agents 133
Smart Web References 134
Service Agents 135
Developing Client-side UI Modules 136
Model-View-Presenter Pattern for SCSF Views. 137
Events and Event Publications in the Smart Client UI. 139

Extraction of Core Assets 142
Testing the Common Assets 143
Unit Testing 143
Interfaces and Testing 144
Summary 145

CHAPTER 7 Software Factory Template: Development Core Assets 147

Guidance and Guidance Automation 148
The Basics 148
The Guidance Automation Toolkit 152
ISpySoft GAT Packages 155
Variabilities and Domain-specific Languages 166
Windows Workflow Foundation 169
Customizable Expense Approval Process in ISpySoft Using Windows Workflow Foundation 171
Packaging and Deployment of the Software Factory Template 173
Merge Modules Inside MSI Packages 174
Installing Third-party MSI Packages 175
Deployment Projects with Visual Studio 2005 175
Summary 176

CHAPTER 8 Product Development 179

Software Factory Template Installation 180
Private Eye Investigators Application Specification 181
Problem Definition 182
Solution Definition and Requirements Specification 185
Selecting Variable Features 185
Private Eye Investigators Application Architecture 186
Private Eye Investigators Application Implementation 188
Unfolding the Visual Studio Solution Template 189
Customizing Back-end Workflows 189
Creating a New Web Service 191
Creating a New Module 193

Private Eye Investigators Application Deployment 194
Smart Client Deployment 194
Back-end Deployment 195
Summary 195
A Look into the Crystal Ball 196
Short-term Goals 197
Long-term Goals 198
Parting Thoughts 200

APPENDIX **Software Factory Development: Checklist** 201
